

John B. Fenn, Sr. Endowed Scholarship

John Bennett Fenn received the 2002 Nobel Prize in Chemistry for development of electrospray Ionization (ESI), an important technique used in mass spectrometry.

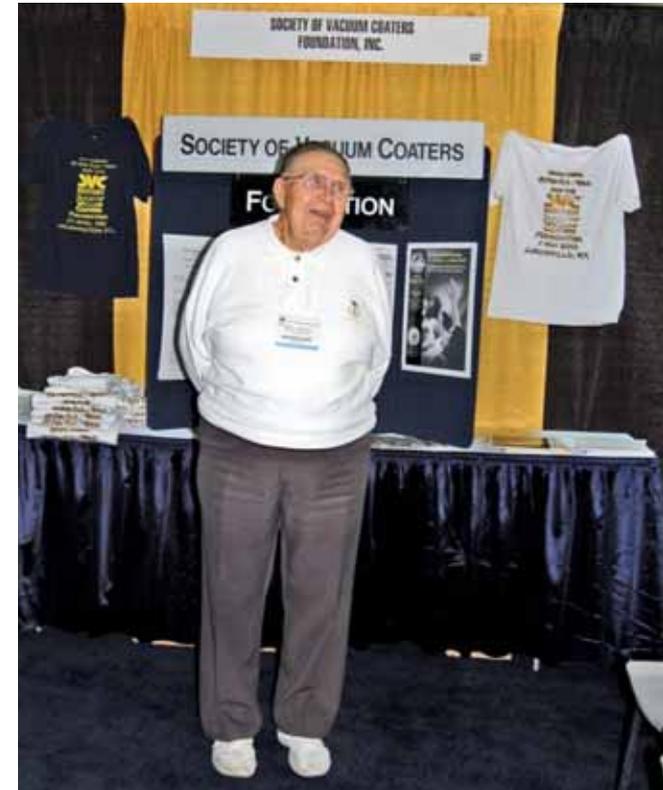

John gave the Plenary Address at the 2004 SVC TechCon. This, coupled with the interests of his son John B. Fenn, Jr., a long time participant in the SVC, led him to create this scholarship. Committed to education and to solving problems of a practical and useful nature, he felt the SVC was a good venue for finding students with the same inclination.

Frank and Jane Warchol Scholarship Fund

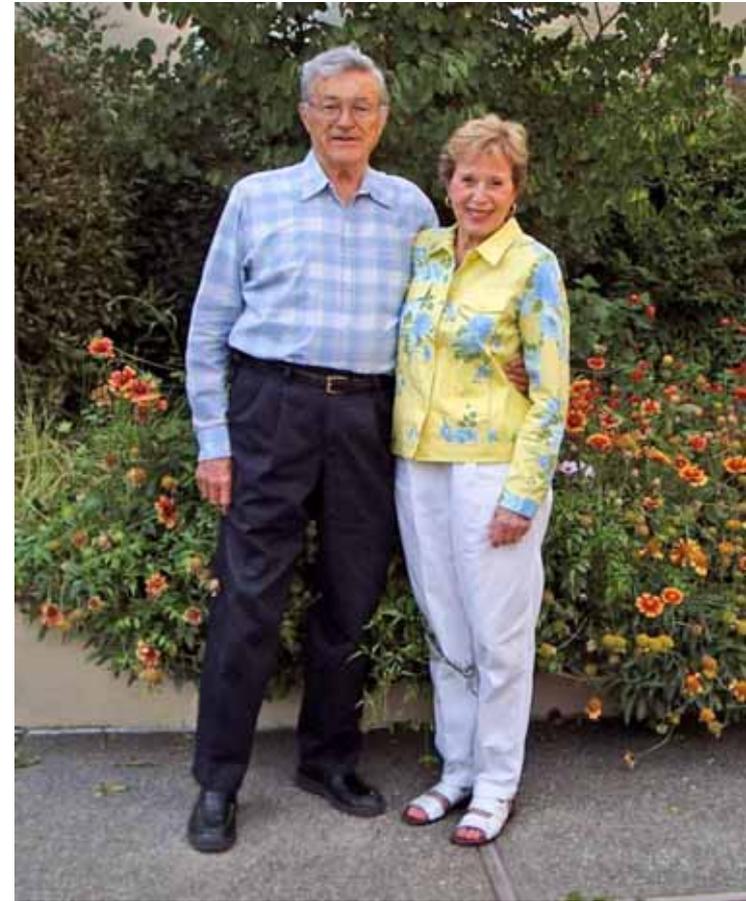

- Frank Warchol developed an interest in chemistry, combined with metallurgy, electro chemistry, paint, plastics, and vacuum technology at General Motors. Frank and family (Richard and Jerry) founded Vacumet Finishing in June 1959. Vacumet evolved through the years to Masco Tech Coatings in 1989, followed by Innovative Coatings in 1998. In the 1999/2000-time period Jane and Frank formed VacuCoat Technologies, Inc. The family is still supporting the Society of Vacuum Coaters today as they did on Day 1 in 1957.
- Frank has said - “Jane & I want to give back to the society - and the vacuum coating industry that it serves - some of that which it has given to us over the past 50 years. We are proud to be associated with the SVC - it has come so far over the years. We want to support the education of young people coming into this industry. We were impressed by the goals of the Foundation that were described in the 2006 summer issue of the SVC *Bulletin*.”

Helen and Rolf Illsley Scholarship Fund

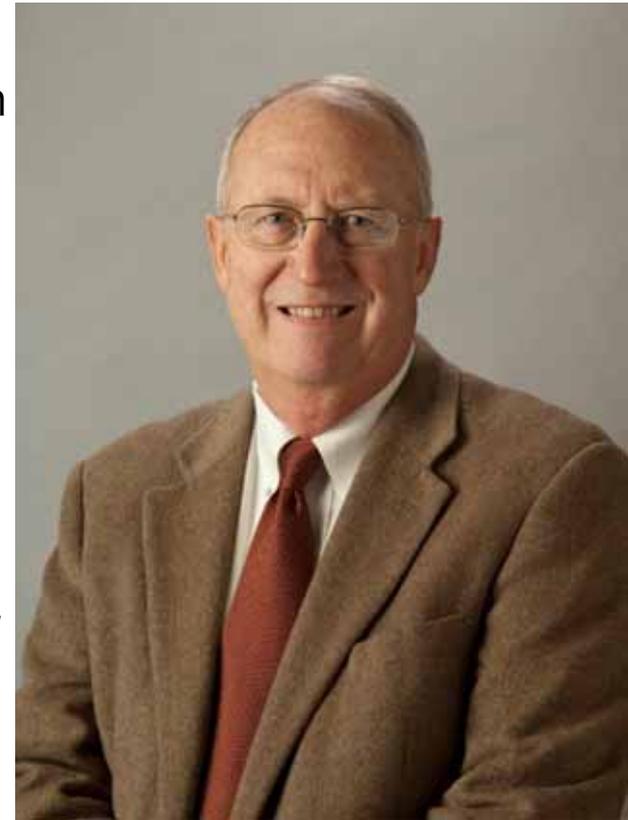

- Rolf Illsley was co-founder of Optical Coating Laboratory, Inc., (OCLI) in 1948, was President & Chairman of the Board of OCLI until his retirement in 1991. Helen joined OCLI in 1963, as Rolf's assistant, and remained with the company until 1989 when Helen and Rolf married. OCLI was purchased by JDS Uniphase in 2000.
- The Helen and Rolf Illsley fund is a reflection of Rolf's commitment to helping the vacuum coating industry continue to grow. Rolf and Helen live in San Rafael, CA, and enjoy flying both as a hobby and as a business.

J.A. Woollam Company Endowed Scholarship

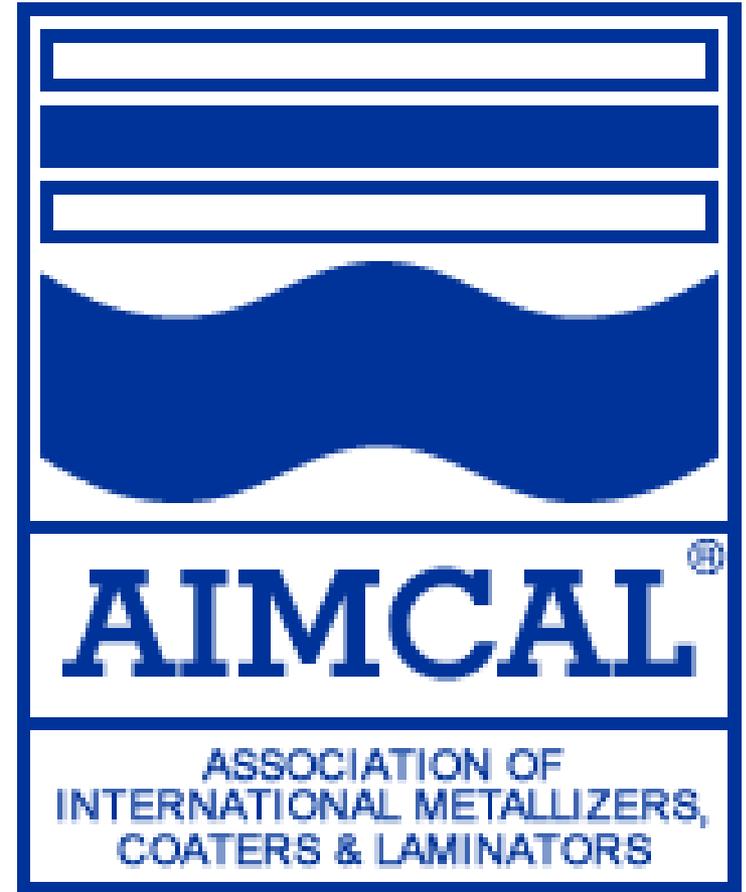

- John A. Woollam is a Distinguished Professor at the University of Nebraska in Physics and Electrical Engineering. His research has focused on the study of thin films which led to his involvement in spectroscopic ellipsometry (SE). In 1987, he founded the J.A. Woollam Company to develop and enhance the state-of-the-art in SE instruments.
- His dedication to science education involves funding and involvement in programs for middle-school through post-doctoral education levels. He strongly supports the SVC Foundation's goal of encouraging students to continue advanced science education and get the excellent opportunity to present their work at the Techcon.

AIMCAL – Platinum Supporter

- AIMCAL has actively supported the Bernard Henry Fund through donations, 5K fund raisers, and other venues.

The Bernard Henry AIMCAL and SVC Scholarship Fund

- AIMCAL and the Society of Vacuum Coaters, with the participation of many donors, have established The Bernard Henry AIMCAL and SVC Scholarship Fund in honor of the late Bernard Henry.
- Bernard Henry made major contributions to science with his work on flexible gas barrier materials. From 2000, Bernard began work on polymer solar cells where he focused interest on transparent conducting materials like TiO_2 and ZnO . Bernard also maintained a very active interest in the thin film barrier field and in 2006 became project manager for the production-scale web coater facility in the Oxford Materials Department.

Michael Hansen Memorial

Michael Hansen was a past president of the SVC who passed away several years ago. He was important to Jim Seeser in several ways, not only for his good nature and positive attitude, but also for introducing him to many aspects of the vacuum coating business and particularly, in 1977, to the SVC and its benefits. Michael became active in the SVC, being president 1990-1992. A donation to the Foundation in Michael's name was the perfect way for to remember him and to remind others of his contributions.

We remember him fondly.
